Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a rpoB promoter element, classified in class 536, subclass 24.1.
 - II. Claim 2, drawn to a atbB promoter element, classified in class 536, subclass 24.1.
 - III. Claim 3, drawn to a clpP promoter element, classified in class 536, subclass 24.1.
 - IV. Claim 4, drawn to a 16S rRNA promoter element, classified in class 536, subclass
 - V. Claims 5-7, drawn to constructs comprising an NEP promoter element and an PEP promoter element, classified in class 536, subclass 24.1.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I-V are independent and distinct from each other. Nucleotide sequences comprising different promoters are structurally distinct chemical compounds that are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Each sequence requires an independent search of the sequence databases. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq (see MPEP 803.04 and 2434).

3. Additionally, upon election of a Group, Applicant is additionally required to select a single nucleotide sequence for said Group, as appropriate. This requirement is not to be construed as a requirement for an election of species, since each nucleotide sequence is not a member of single genus of invention, but constitutes an independent and patentably distinct invention.

If Applicant elects Group III, clpP promoter elements can be elected by organism; thus Applicant can elect rice (SEQ ID NOs:13, 16, 17, 22 and 31), wheat (SEQ ID NO:14), tobacco (SEQ ID

Art Unit: 1638

NOs:15 and 21), Marchantia (SEQ ID NO:18), pine (SEQ ID NO:19), spinach (SEQ ID NO:20), Arabidopsis (SEQ ID NO:24), unknown 1 (SEQ ID NO:25) or unknown 2 (SEQ ID NO:26).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper.

Applicant is advised that for the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Sequence Rules

5. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825.

Sequence identifiers are missing from pg 22, lines 7 and 20.

The nucleotides of SEQ ID NO:25 that the sequence on pg 33, line 4, is taken from is missing.

Full compliance with the sequence rules is required in response to this Office action. A complete response to this Office action must include both compliance with the sequence rules

Art Unit: 1638

and a response to the issues set forth herein. Failure to fully comply with both of these requirements in the time period set forth in this Office action will be held to be non-responsive.
